Green University Project: Energy saving activity (Air-conditioner maintenance)

Academic Resource and Information Technology Center (ARIT), Kanchanaburi Rajabhat University has carried out the Green University Project: Energy saving activity (air-conditioner maintenance) to maintain air-conditioners in the Academic Resource and Information Technology Center. To extend the lifespan of air-conditioners, save energy, and reduce electricity costs. ARIT has 168 air-conditioners maintained twice a year by cleaning filters, washing parts, and checking the refrigerant level of the air-conditioners.
